

FMCG and Bakery (Food & Beverages Distribution) - GPS Tracking

Description

A step ahead, we are offering GPS tracking system for bakery and food industry. Our GPS tracker allows you to track live location, stoppage, km report and temperature of the vehicle carrying bakery products to keep the product fresh.

Data can be sent to your email or phone. Can also send SMS with the location of your vehicle. This system is reliable in the absence of internet connectivity.

Our GPS Tracking System is designed to monitor the live location of your products so that you can be assured that they are reaching their destination safely. Report on weather conditions and temperature changes by zone.

Our system will also continuously monitor the temperature in your vehicle carrying bakery products.

For great benefits in Food & Beverages Distribution, get this awesome reliable system. #Gaddi24
